

Overview

CONNX is a leading provider of timely data integration and event capture software. Our data access solutions enable you to join information from multiple data sources, no matter where they reside in your enterprise, delivering a complete view of your data as if it existed in a single, relational database which eliminates the need for custom coding or writing extracts.

So, no matter what the project, if you need simplified access to legacy systems, or multiple databases, CONNX is the tool of choice for your business, just like the over 3,000 satisfied customers worldwide. CONNX is a privately held company that resides in Redmond, WA, that has been in business since 1989.

Mission Statement

Data access and integration made simple. We are dedicated to transforming how our worldwide customers and partners use, integrate, and access data by providing the means to make data access problems irrelevant. Our solutions position organizations to meet the IT challenges of today while providing a reusable framework for the future.

"I would like to show my appreciation for your technical support Department. Minutes after I logged an email request for help, technical support was in contact with me and solving our issue. It is so wonderful to deal with a company that really puts customer service first. Again, thanks for everything and keep up the great work. Wonderful Product...Wonderful Customer Service. A+++."
